Quick Actions

Milo low stock - reorder tomorrow

Tuesday sales -40% below avg

Nescafe trending +85% - consider stocking

T H E

\$10 Billion

"Intuition Gap"

SMEs are fighting a data war with outdated weapons — intuition and spreadsheets.

98%

of MY businesses
are SMEs

70%

decisions based
on gut feeling

Data Isolation

Sales data sits idle — no time or tool to act on it.

Blind Decisions

70% of inventory choices are pure gut feeling.

The Cost

Overstocking wastes capital.
Stockouts lose loyal customers.

Complexity Overload

Weather + holidays + trends — impossible to track manually.

Not Just Automation

"We don't just show charts — we give you a reasoning partner that tells you what to do and why."

BUILT FOR THE LOCAL

"Kedai Runcit"

& Every Malaysian SME

Persona: Kak Siti

Mini-market owner · 12 yrs experience · Relies on intuition

User Story:

"As an owner, I want to know if I should stock more Milo before the rainy school holiday week — so I don't miss out on sales."

98% of Malaysian businesses are SMEs — this is their tool.

Mini Market

Convenience stores, kedai runcit

Retail

Shops, e-commerce

Food & Hospitality

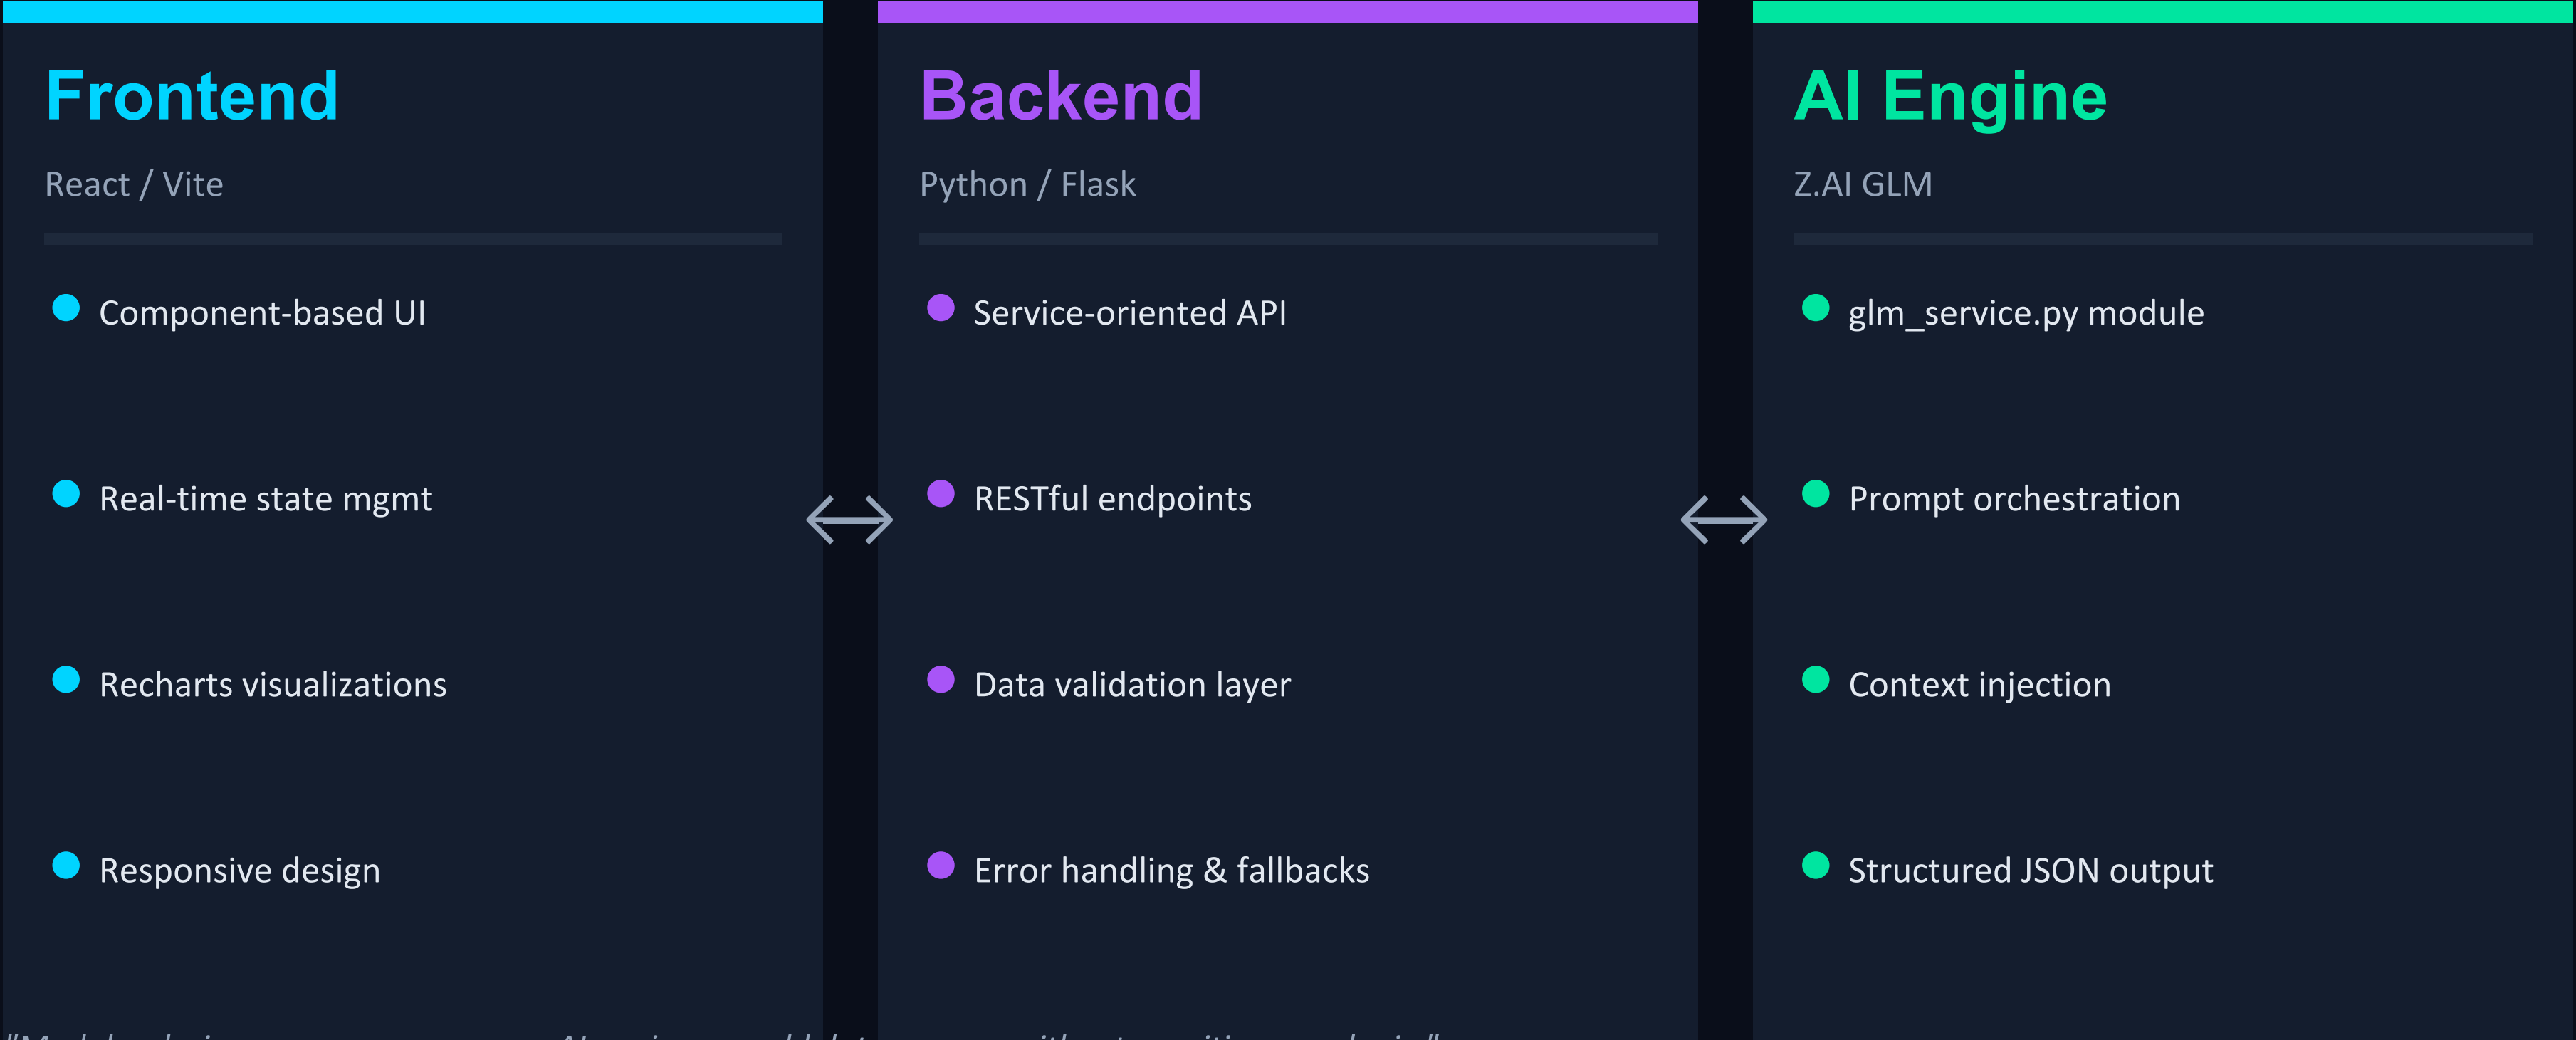

Restaurants, cafe

Services

Salon, workshop

SCALABLE & MODULAR

Engineering Architecture

"Modular design means we can swap AI engines or add data sources without rewriting core logic."

Decision Support — The 4 Pillars

01

Data Analysis

- MoM & YoY growth metrics
- Profit margin breakdown
- Category performance
- Peak hour heatmap

02

Predictions

- 7-day sales forecast
- 30-day trend projection
- Demand spike alerts
- Confidence scoring

03

Action Checklist

- Reorder level alerts
- Trending item suggestions
- Supplier timing advice
- Priority ranked tasks

04

AI What-if

- Price change simulation
- Promo impact forecast
- Stock-level scenarios
- Plain-language reasoning

KNOW BEFORE IT TRENDS

Trending Alerts — First Mover Advantage

1

Auto-Fetch

System pulls Google Trends data for your product category & region every morning.

2

Spike Detection

AI identifies search volume spikes above 50% — a leading indicator of demand.

3

Alert Generated

GLM translates the signal into a plain-language action the owner can act on immediately.

4

Checklist Updated

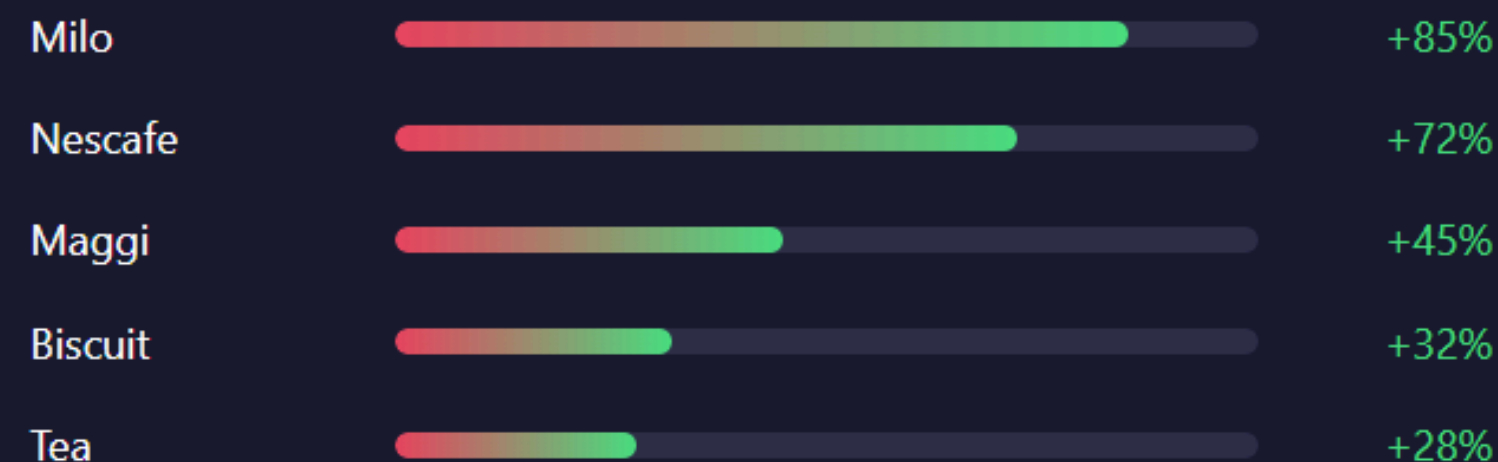

"Order 30% more Nescafe this week" appears in the owner's Action Checklist automatically.

First-mover advantage for small businesses — built in.

Google Trends

Active

Search popularity for items in your area

AI Recommendation:

AI Insight

Based on external data: Milo search +85%, weather clear for the week, upcoming school holidays Apr 20. **Recommendation: Stock up 30% on beverages, expect +25% traffic during holidays.**

BUILT FOR RELIABILITY

Quality Assurance & Testing

Scenario Validation

Tested against simulated Festive Peak vs Off-Peak datasets to validate AI reasoning accuracy across demand extremes.

Error Handling & Fallbacks

API timeout fallbacks, missing data graceful degradation, and user-friendly error states ensure zero dead-ends.

Data Integrity Layer

Input sanitization pipeline ensures AI reasoning is always based on clean, validated data — no garbage in, no garbage out.

Explainable AI (XAI)

Every prediction includes a plain-language 'Why' — meeting AI safety standards and building user trust.

Interface & Usability

Action-Oriented

Never make the owner think. Every insight becomes a checkbox.

Visual-First

Color-coded alerts: Red = low stock, Green = healthy margin.

Web-Based & Accessible

Runs in the browser with no installation, making it easy for SME owners to access from any laptop or desktop.
